

COLOUR ME IN

THE ATKINSON

African Savanna

- 175 bricks used
- 8 hours to build
- Location: Central & South Africa

Savannas cover around 20% of the worlds' land mass and are found on many continents, combining scattered trees with grassland. This scene represents the natural wonder that is the biodiversity of Africa.

Whilst it's not too common to see a herd of Elephants, giraffe, monkeys, ostrich and crocodiles all getting on together, at least it makes a good photo opportunity!

The animals we've used here are mainly LEGO Duplo animals - aimed at smaller children. Their bigger size fits perfectly with the LEGO tourists - and of course they are too cute to ignore!
